

TRANSCUBE RENTAL

IRONCLAD'S FUEL TANK RENTAL PROGRAM

IronClad's fuel tank rental program utilizes the TRANSCUBE TCG double-walled UL-142 fuel storage tank systems. You will benefit with a first-rate, heavy-duty fuel tank that will comply with the highest environmental criteria. DOT approved for over-the-road transportation gives you the flexibility to move the tank from location to location without the headache of traditional fuel storage tank transportation rules. Tank sizes available are 250 gallon, 500 gallon and 800 gallon with the option of a 12 Volt or 115 Volt Pumping System with meter.

DURABLE

The Transcube is manufactured with high quality materials and can withstand the harshest of conditions. Ideal for construction job sites large or small, in-city or remote locations, road or excavation. The Transcube is your choice for worry-free fuel storage and dispensing.

TRANSPORTABLE

The Transcube TCG line of tanks is the industry leader of double-walled, above ground portable tanks that serve all sectors of the construction, power generation, and mining industries. With Internal baffles, 4-way forklift pockets, lifting/stacking corner brackets, and DOT approval, these tanks are the solution to your fueling needs. The certified corner brackets allow the tanks to be craned while full, while the internal baffles allow the tanks to be transported on the road even while full.

ENVIRONMENTAL PROTECTION

Transcube's fill and connection points are all inside the secondary containment cabinet keeping all accidental drips and spills from contaminating the environment. Any drips or spills made during connection of the equipment are kept exactly where they should be kept - safely inside the secondary containment area.

Enviroconnect Cabinet

COMPLIANT FOR YOUR JOB SITE OR BUSINESS

Whether your fuel tank will be placed near a large body of water or as small as a creek, or your business is near a natural reserve, the Transcube's environmentally-friendly features protect the environment. Along with the DOT approval which allows you to move the tank safely on any job site or business yard, your inspector will be glad you chose to do business with IRONCLAD.
